INDEX

Abrams, Duff A.
Water Cement Ratio as a Basis of Concrete Quality, 452.

Ackerman, Frederick L.
Architectural Theory of Concrete Design, 257.

Aggregates.
Qualifications of Different Kinds of Stone for Concrete Aggregates, by G. F. Loughlin, 319.
Coarse Aggregate as a Field for Needed Research, by H. J. Gilkey, 363
Report of Committee, E-5, 573.

Allen, Leslie H.
Discussion, 255, 256.

Architectural Concrete.
Art Marble, by I. L. Stearn, 220.
Architectural Theory of Concrete Design, by Frederick L. Ackerman 257.
Architectural Uses of Concrete, by Irving K. Pond, 269.
Structural and Aesthetic Possibilities, by John C. Austin, 263.

Austin, John C.
The Uses of Concrete on the Pacific Coast—Its Structural and Aesthetic Possibilities, 263.

Bates, P. H.
Why Time Is a Factor in the Study and Use of Cement, 436.
Discussion, 488.

Benson, Newton D.
Suggestions on the Manufacture of Concrete Block, Brick and Tile, 196.

Bogue, R. H.
Portland Cement in Concrete Engineering, 355.

Bourne, C. L.
Discussion, 700, 701.

Bühler, Adolf.
Construction of the Grandfey Viaduct, 489.

INDEX

Abrams, Duff A.
Water Cement Ratio as a Basis of Concrete Quality, 452.

Ackerman, Frederick L.
Architectural Theory of Concrete Design, 257.

Aggregates.
Qualifications of Different Kinds of Stone for Concrete Aggregates, by G. F. Loughlin, 319.
Coarse Aggregate as a Field for Needed Research, by H. J. Gilkey, 363
Report of Committee, E-5, 573.

Allen, Leslie H.
Discussion, 255, 256.

Architectural Concrete.
Art Marble, by I. L. Stearn, 220.
Architectural Theory of Concrete Design, by Frederick L. Ackerman 257.
Architectural Uses of Concrete, by Irving K. Pond, 269.
Structural and Aesthetic Possibilities, by John C. Austin, 263.

Austin, John C.
The Uses of Concrete on the Pacific Coast—Its Structural and Aesthetic Possibilities, 263.

Bates, P. H.
Why Time Is a Factor in the Study and Use of Cement, 436.
Discussion, 488.

Benson, Newton D.
Suggestions on the Manufacture of Concrete Block, Brick and Tile, 196.

Bogue, R. H.
Portland Cement in Concrete Engineering, 355.

Bourne, C. L.
Discussion, 700, 701.

Bühler, Adolf.
Construction of the Grandfey Viaduct, 489.

Buildings.
Design of Concrete Buildings for Wind Stresses, 101.
Behavior of Engineering Structures in Violent Wind Storms, by Roy L. Peck and Norman M. Stineman, 275.
Reinforced-Concrete Building Design and Specifications, 643.
Standard Building Units, 689.

Burns, Albert S.
Discussion, 699.

Business Report 703.

Carswell, J. B.
Discussion, 681.

Cement.
Portland Cement in Concrete Engineering, by R. H. Bogue, 355.
Tests of Colors for Portland Cement Mortars, by Raymond Wilson, 226.

Chandler, George D.
Effect of Finely Ground Cements on Concrete Products Manufacture, 183.
Effects of Time Before Placement in Concrete Pipe Manufacture, 483.

Chapman, Cloyd M.
Discussion, 469, 683, 699, 701.

Columns.
The Reinforced-Concrete Column, by Phil J. Markmann, 126.

Committee Reports.
E-3: Researches on Concrete Materials and on Plain and Reinforced-Concrete, 539.
E-5: Aggregates, 573.
P-6: Concrete Products Plant Operation, 607.
C-4: Steel Forms for Flat-Slab Construction, 626.
C-6: Economic Advantages, Field Control of Quality of Concrete, 631.
E-1: Reinforced-Concrete Building Design and Specifications, 643.
S-6: Concrete Curb and Concrete Curb and Gutter, 684.
P-1: Standard Building Units, 689.

Concrete Making.
Time as a Factor in Making Concrete: M. M. Upson, P. H. Bates, Duff A. Abrams, T. H. Johnson, John J. Earley, W. Paul Eddy. F. F. Longley, George D. Chandler, 434.

Concrete Products.
Cut Cast Stone, by Henry P. Warner, 206.
Art Marble, by I. L. Stearn, 220.
Operating Problems in Concrete Products Manufacture, 179.

Crabbs, Austin.
Arrangement and Design of Curing Rooms, 185.

Earley, John J.
Discussion, 253, 472.
Time as a Factor in Making Portland Cement Stucco, 473.

Eddy, W. Paul.
Time as a Factor in Making Concrete—Cast in Sand Molds, 479.

Fatout, Ray T.
Discussion, 642.

Flam, Stephen.
Discussion, 471.

Forms.
Steel Forms for Flat-Slab Construction. Report of Committee C-4, 626.

Foster, C. B.
Discussion, 108.

Gilkey, Herbert J.
Coarse Aggregate in Concrete as a Field for Needed Research, 363.
Discussion, 70, 142, 407, 468.

Godfrey, Edward.
Discussion, 170, 678.

Goetz, John A.
A Rural Concrete Products Plant, 199.

Gonnerman, H. F.
Discussion, 399.

Hadley, H. M.
Discussion, 167.

Harding, E. C.
Discussion, 683.

Harrison, Merritt.
Discussion, 254.

Havlik, Robert F.
Wet Cast Process of Manufacturing Concrete Stone, 213.

Herzog, C. J.
Applying Scientific Principles to Concrete Products Manufacturing, 189.

Jackson, F. H.
Discussion, 353.

Johnson, C. S.
Discussion, 76.

Johnson, Nathan C.
Discussion, 353.

Johnson, T. H.
Time as a Factor in Making Concrete Pavement, 458.
Discussion, 469, 470, 471, 472.

Kriege, H. E.
Discussion, 352.

Lagaard, M. B.
Discussion, 167, 701.

Lindstrom, Robert Seth.
Discussion, 254, 274.

Longley, F. F.
Time as a Factor in Making Concrete—Centrifugal Pipe Manufacture, 481.

Lord, Arthur R.
Notes on Concrete, Wacker Drive, 28.
Discussion, 469, 470, 471, 486, 683.

Loughlin, G. F.
Qualifications of Different Kinds of Natural Stone for Concrete Aggregate, 319.
Discussion, 352.

Manning, Lieut. Comdr. J. J.
Construction of Reinforced-Concrete Pier, Bremerton Navy Yard, 79.

Markmann, Phil J.
The Reinforced-Concrete Column, 126.
Discussion, 178.

McBeth, R. W.
Discussion, 471.

McKay, Earle D.
Report of Tests on 300-Ft. Reinforced-Concrete Chimney, 109.
Discussion, 625.

McKee, S. C.
Discussion, 471.

McMillan, F. R.
Discussion, 447, 680, 682.

Mellos, John S.
Discussion, 472.

Merriman, Thaddeus.
Discussion, 486, 494.

Miner, J. L.
Discussion, 642.

Operating Problems in Concrete Manufacture.
W. H. Warford, Geo. D. Chandler, C. J. Herzog, Benjamin Wilk, Newton D. Benson, John A. Goetz, Lacey Peyton, 179.

Pearson, J. C.
Discussion, 307.

Peck, Roy L.
Behavior of Engineering Structures in Recent Violent Wind Storms, 275.

Peyton, Lacey.
Ups and Downs in Products Manufacture, 202.

Pond, Irving K.
Architectural Uses of Concrete, 269.

Reinforced-Concrete Structures.
Notes on Concrete, by Arthur R. Lord, 28.
Construction of Reinforced-Concrete Pier, by Lieut.-Commdr. J. J. Manning, 79.
Report of Test on Reinforced-Concrete Chimney, by Earle D. McKay, 109.
The Reinforced-Concrete Column, by Phil J. Markmann, 126.
Construction of the Grandfey Viaduct, by Adolf Bühler, 489.
Behavior of Reinforced-Concrete Structures in Wind Storms, by Roy L. Peck and Norman M. Stineman, 275.

Richart, F. E.
Discussion, 176.

Ries, H.
Discussion, 354.

Rockwood, E. F.
Discussion, 630.

Shepherd, J. C.
Discussion, 681.

Smith, Albert.
Design of Concrete Buildings for Wind Stresses, 101.
Discussion, 108.

Standards.
Tentative Standard Building Regulations for the Use of Reinforced Concrete, 644.
Tentative Standards for Concrete Curb and Concrete Curb and Gutter, 684.
Tentative Standards for Concrete Manhole and Catch Basin Block, 694.
Standard Specifications for Concrete Building Block and Concrete Building Tile, 696.

Stearn, I. L.
Art Marble, 220.

Stineman, Norman M.
Behavior of Engineering Structures in Recent Violent Wind Storms, 275.
Discussion, 318.

Talbot, Arthur N.
Discussion, 177, 178, 406.

Tests.
New Test for Workability of Concrete, by Tokujiro Yoshida, 421.
Report of Tests on 300-Ft. Reinforced-Concrete Chimney, by Earle D. McKay, 109.
Tests of Colors for Portland Cement Mortars, by Raymond Wilson, 226.

Toch, Maximilian.
Discussion, 253, 256.

Upson, M. M.
President's Address, 22.
Time as a Factor in Making Concrete, 434.
Discussion, 470.

Warford, W. H.
Establishing and Operating a Concrete Block Plant, 179.

Warner, Henry P.
Cut Cast Stone, 206.

Way, W. F.
Discussion, 99.

Registrants 706.

Wheeler, Walter H.
Discussion, 398.

Wilk, Benjamin.
Application of Scientific Methods in Concrete Block Manufacture, 192.
Discussion, 254, 700, 701.

Williams, G. M.
Discussion, 73, 405.

Wilson, Raymond.
Tests of Colors for Portland Cement Mortars, 226.

Woolson, Ira H.
Discussion, 625, 702.

Yoshida, Tokujiro.
New Test Method for the Workability of Concrete, 415.

Young, R. B.
Discussion, 642.
